CHAPTER 8

What's Next

Congratulations on completing the course! You've earned the course completion badge.

We hope you've enjoyed this brief tour of the R language. This has only been a small taste of the power and flexibility that R provides for managing and visualizing your data, though. If you're wanting to take the next step with R, check out the [official R Programming site](#) and download and install R on your local computer. It'll work just the same as it did in this course!
